

BUILDING INSPECTION TRAINING COURSE

Inspection of buildings is becoming a necessity for newly handed over properties as well as for old buildings for maintenance purposes. With rising consumer expectations on quality workmanship, and for continuous proper maintenance & management of properties there is a demand for and in need of independent inspections to help look out for building defects that - IF go unreported or undetected - may bring financial and social impacts to the owners and communities at large. **Know about building defects, learn how to identify them with the right remedies.** For more info on building defects visit: <http://www.architectcentre.com.my>

SKILLS-TRAINING

This training course will train you to conduct a systematic and thorough visual inspection using a 'defects-cause-analysis' methodological framework to help increase defects detection techniques for buildings.

BASIC Course (1 day) is opened to the public and building & property industry practitioners. It is aimed at raising awareness on defective buildings and their accompanying issues. Participants will benefit from learning how inspection reports are done, how to take advantage of an independent inspection in minimising costs and heartaches when investing in properties and to protect their assets from devaluation.

ADVANCED Course (2 days)

This advanced course is opened to all Professionals in the industry to upgrade their skills and knowledge on building inspection and defects. It is also a pre-requisite course to qualify for accreditation **as an Architect Centre's Accredited Architect and Panel Consultant.***

*Be an Architect Centre Accredited Consultant to provide professional building inspection and advisory services to public. If you have 10 years or more experience in construction work, enjoys working on site, and would like to leverage on Architect Centre for more business opportunities – **register now!***

* Only PAM Corporate Members and Professional Members of ACEM, IEM, ISM with minimum 10 years experience may qualify to be accredited after having passed the Advanced course (inspection reports must be submitted for review during training).

Limited seats only!

Architect
centre

"Very informative, and enlightening especially on the systematic way to identify defects, finding the root cause and how to remedy it" – Ar Hani Fauziana, Akitek MAA S/B
