

SYNOPSIS In the effort to streamline the implementation of Government IBS projects in the 9th Malaysia Plan, all Ministries, Agencies, State Governments and Local Authorities are required to consider only projects with a minimum 70% of IBS components. This is to drive the construction industry towards high productivity and quality, reduction of foreign labour and creation of a sustainable, component based IBS industry – in the face of greater competition when the market is liberalized by 2012.

The CIDB IBS Consultant Listing Programme is a scheme to list all IBS consultants involved in IBS projects and undergone seven CIDB IBS training courses (The courses are marked with*). The listing objective is to facilitate consultants to implement IBS projects. Accomplished participants will be awarded with IBS Consultant Status.
